# BIOPAP® FLYING GENIUS

self-supporting meal tray.  
Innovative, compostable, sustainable system  
for Airline catering

- ✓ Improving Passenger experience
- ✓ Extra stiffness for safe staff and passengers handling
- ✓ Centralised food preparation
- ✓ Meal tray safely heated and served
- ✓ Reduced waste handling time: no sorting and food separation needed on board and in Airport
- ✓ Extra light, less weight on board. Same space, -75% weight, less CO2 emissions
- ✓ No washing up. No process water, energy, detergents
- ✓ Single containers sealed with BIOPAP® EASY OPEN hard lid system or with compostable top-sealing film
- ✓ Thermal insulated version for separated hot/chilled meal service
- ✓ Modular, high production flexibility
- ✓ Fully compostable with food waste, reducing treated weight by 80%, reducing waste management costs, promoting local Circular Economy
