

Declaration of absence of fluorinated substances (PFAS) in BIOPAP® WRAP

Since the design phase of our products and materials, we have never considered the use of fluorinated substances (PFAS).

Furthermore, the results of PFAS content determination following solvent extraction and subsequent LC MS/TOP analysis of the sample demonstrate the complete absence of detectable traces of these compounds.

Report n° 2391\FPM\FDC\21 del 08/02/2022

Analysis		Worst case calculation	Results
Fluorinated compounds (PFAS)	Solvent extraction +LC-MS/TOF	<0,001 mg/kg of food	<0,0001 mg/dm ² <LoQ
